Embedding LibGuides in Blackboard with LTI

1. Navigate to the content area where you want to add a LibGuide. In the content area, hover over Tools in the menu at the top and select **Library Research Guides**

![LibGuide Menu](image)

2. Enter the Name of the guide and any other necessary information. Click Submit.
   *Note* **The title you type cannot have an apostrophe. We’re working on fixing this.**

3. Click on the link you created.

![LibGuide Link](image)
4. In the LibGuides Site drop-down, select **UofL Libraries**. In the Content Type drop-down, select **Full LibGuide**. In the Guide drop-down, select the guide you want to embed. (Leave Guide Page blank unless you want to choose a landing page other than the home page.) Click Embed Content.

5. You will see an icon indicating your success embedding the module. To see what the embedded guide will look like for students, go back to the Blackboard shell and enter **Student Preview**.

6. In Student Preview, navigate to the content area where you added the guide, then click on the guide. You’ll be taken to the guide embedded in Blackboard. This is what students will see when they click the guide.
