**GfK MRI University Reporter**

GfK MRI maintains databases used by advertisers to evaluate print and online publications. They include circulation, frequency, editorial profiles, rates, publication dates, closing dates and audience demographics, as well as product/service/brand usage data collected from a national probability sample of 25,000+ households in GfK MRI’s Survey of the American Consumer™. UofL Libraries has access to GfK’s MRI publication databases and audience data through University Reporter. The only exception is the most recent year of audience data which is not available to academic libraries.

**Accessing University Reporter**

***************

Use of GfK MRI University Reporter is limited to faculty, staff, and students at the University of Louisville who hold valid UofL user accounts and accept individual license terms as stated on the MRI UR website. Authorized users may use the confidential and proprietary data solely for academic teaching and research purposes and in accordance with other individual license terms. Users are responsible for understanding and complying with access and use terms. GfK MRI may terminate an individual’s access to the databases in the event of unauthorized uses.

***************

1. Go to [www.gfkmrismartsystem.com](http://www.gfkmrismartsystem.com)
2. Click on “Register” to start the process.
3. On the next page, enter UofL’s registration code, **4DV9QAW8**, your full name and your University of Louisville e-mail account (i.e., “@louisville.edu”) Do not include “CardMail”. Other e-mail addresses will not be accepted!!! Click “Register”.

4. You will receive a confirmation e-mail from clientservices@gfkmri.com with a validation link to the University Reporter website. Note the link must be used within 3 days.
5. Clicking on the link will take you to a screen that looks like this:

![Screen Capture of Login Page](image)

Enter and confirm a password that is between **8 and 16 characters in length and has at least one alphabetic letter and one numeric digit**.

6. You can now use University Reporter. Go to: [https://www.gfkmrismartsystem.com](https://www.gfkmrismartsystem.com)

If you have trouble logging in, please try again in a few minutes. UofL’s contract allows for 10 simultaneous users.

Also, please note that you will be logged out automatically after 20 minutes of inactivity.
Using GfK MRI University Internet Reporter

1. On the first screen, click on the University Reporter icon:

2. On the next screen select “2018 Spring GfK Reporter MRI.” On the next page that opens, select a category from the drop down list (e.g., “Electronics”), or type a product category or brand name in search box at top:
3. Scroll through the drop down list on the next page to select a subcategory and question. For example, “Tablets & E-Readers – Activities”:

4. Modify the report window by selecting the report type (standard 1 year vs. 3-year trend), sample base (e.g., total adults vs. female principle shoppers, etc.) and the details (desired brand and/or subcategory). This example provides data on individuals who used a tablet or e-reader to obtain information on travel. Although not shown, some category detail lists include frequency of use.
5. Individual brands, activities, or other items listed in the detail column may be combined into one report by using the CTRL key and left clicking on items you want to group together.

6. Each report may be saved (A) or downloaded into a Microsoft Excel spreadsheet (B). Saved reports may be retrieved from the folder (C).
7. **Tips for reading University Reporter reports:**

GfK surveys adults (≥ 18) in 25,000+ households and reports projected findings for the entire United States.

A. The “BaseTotal ‘000” column lists the number of people in the U.S. in the selected base group (e.g., 247,024,000 total adults in Spring 2018), as well as subgroups of the base group described in row headings in the Target column (e.g., 76,755,000 adults with college degrees, including some with education beyond an undergraduate degree).

B. The next column, labeled “‘000” shows the projected number of people in the base group who meet the selected category and target criteria (e.g., 17,293,000 adults over 18 used a tablet or e-reader to obtain travel information, and 7,719,000 were men).

C. “% Detail” is the percentage of the base total (i.e., all people meeting the base, category and target criteria) who fall within each row heading subgroup. (e.g., 55.36% of all adults using a tablet or e-reader to obtain travel information were female and only 6.12% of adults using a tablet or e-reader to obtain travel information were in the 18 to 24 age group).

D. “% Target” is the percentage of the subgroup described in each row heading who meet the selected category and target criteria (e.g., 7.00% of all adults, and 13.55% of all adults with post graduate educations, used a tablet or e-reader to obtain travel information).

E. “Index” indicates the likelihood that a person in the row heading subgroup will meet the selected category and target criteria relative to the total adult population. (e.g., Only 7.00% of all adults used a tablet or e-reader to obtain travel information, but 8.43% of those in the 35-44 age group obtained travel information via a tablet or e-reader. Thus, this age group has a 120 index ((8.43/7.00) x 100 = 120) and is 20% more likely than the total adult population to use a tablet or e-reader to obtain travel information.)
F. If a group is highlighted in red, it means the projected number in Column B is based on an original survey sample size of less than 50 and should therefore be disregarded or used with extreme caution.
